Advanced intraoral diagnostics

One solution for all needs

Advanced digital image processing provides consistent images time after time. Excellent image quality can already be achieved using factory configurations that can still be adjusted easily according to the dentist's diagnostic preferences.

Speed up your digitalisation

Superb results in an instant

Clear and sharp DEXIS Scan eXam One intraoral images reproduce grey-levels accurately to show the required diagnostic information even in the smallest details. Just insert the imaging plate.

As easy and comfortable as film for the patient.

Easy front-side operation – minimum space requirements.

One matching your needs

Multiple imaging plate sizes are available for DEXIS Scan eXam One can be used in all bitewing, periapical and occlusal X-rays. The plates are as easy and flexible to use as film and are particularly suitable for pediatric patients.

Your workflow

As easy to position as film

Fast and easy workflow

The re-useable imaging plates of the DEXIS Scan eXam One system provide an easy-to-learn and comfortable workflow. The entire process from reading the image to display on screen takes only seconds. The system can be operated in a normal daylight environment, no chemicals needed.

Safe workflow

DEXIS Scan eXam One provides additional workflow security by showing the patient name and user ID on its display. The iDOT™ tracking system on the imaging plates helps trace the one used for an individual X-ray image. Damaged plates can be identified and replaced easily.

One solution for individuals and multiple users

Chairside or shared use

DEXIS Scan eXam One is a perfect choice as your personal chairside X-ray imaging solution. It can also be easily shared with multiple users in a network.

Attractive design

The DEXIS Scan eXam One requires little space and looks great! Select from five colours, whichever matches your practice design.
